#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 26 November 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a computer-implemented method for facilitating financial investment in a scholarship contract, classified in class 705, subclass 1.
- II. Claims 12-17, drawn to a computer implemented method for administering a financial product so that the financial product can be traded as a security, the price of which can be determined on the basis of information about a scholarship contract, classified in class 705, subclass 37.
- III. Claims 18-22, drawn to a method of facilitating financial investment in a scholarship contract, classified in class 705, subclass 35.
- IV. Claims 23, drawn to a computer implemented method for facilitating investment in a scholarship candidate, classified in class 705, subclass 38.
- V. Claims 24-28, drawn to a computer system/computer executable program code for facilitating a financial investment in one or more scholarship candidates, classified in class 709, subclass 1.
- VI. Claim 29, drawn to a computer-implemented method for facilitating financial investment in a scholarship contract, classified in class 705, subclass 8.

The following inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, subcombination I has separate utility such as presenting the analysis of the informational data according to the investment criteria. See MPEP § 806.05(d).

In the instant case, subcombination II has separate utility such as determining a price of the financial product on the basis of the informational data. See MPEP § 806.05(d).

In the instant case, subcombination III has separate utility such as forming an investment vehicle. See MPEP § 806.05(d).

In the instant case, subcombination IV has separate utility such as creating a contract with terms designating a return on investment commensurate with a scholarship candidate's future success. See MPEP § 806.05(d).

In the instant case, subcombination V has separate utility such as receive an instruction to make an investment in a scholarship contract to which the scholarship candidate is a party. See MPEP § 806.05(d).

In the instant case, subcombination VI has separate utility such as allocating money collected as a result of the fulfillment of terms contained in the scholarship contract. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The examiner has not contacted the applicant for election over telephone due to the complex nature of the election/restriction requirement (see MPEP §812.01 (R-3)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sara Chandler whose telephone number is 571-272-1186. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Kramer can be reached on 571-272-6783. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
